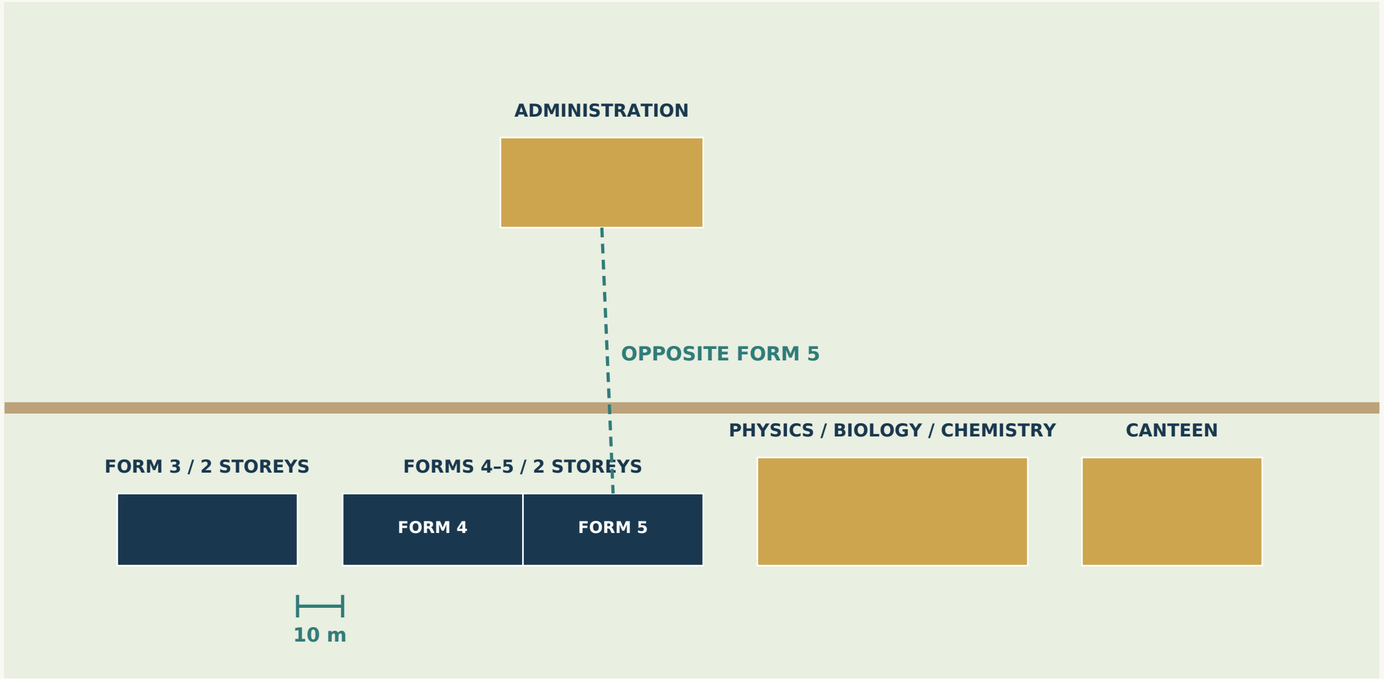
GBHS KUMBA / MAIN CLUSTER

Reconstruction from the author's account. Building footprints, orientation and gap endpoints are proposed; this is not an official site survey.



Blue = two-storey classroom blocks. Gold = one-storey blocks; admin/lab/canteen heights are proposed. The two 500 m values and 10 m separation come from the author; edge-to-edge placement is one proposed interpretation.

School is reported 10.7 km from Zino's compound. Road/footpath/straight-line basis and travel time remain open. Display orientation does not assert true compass bearings. GBHS Sixth Form facilities do not alter Zino's separate boarding-school chapter.
